Don Means  
Gigabit Libraries Network

Dear Don:

To help address the gap in last mile Internet connectivity in Pottsboro, TX, funding is requested to install 3 neighborhood Internet access stations. These will be located in public spaces close to neighborhoods with limited connectivity and/or emergency services. Using maps provided by the Pottsboro Independent School District that identified students without broadband access at home and collaboration with Lorie Lefevers, the president of the board of directors of the Preston Volunteer Emergency Services, the following locations were chosen.

1. Pottsboro Volunteer Emergency Services (PVES) - 85584 N State Highway 289, Pottsboro, TX 75076
2. Preston Center Convenience Store - 83462 N State Highway 289, Pottsboro, TX 75076.
3. Pottsboro Volunteer Emergency Services- Cambridge Shores Fire Station (PVES) - 68 Cambridge Dr., Pottsboro, TX 75076

The two project managers are JJ McGrath of Tekwav (WISP) and Dianne Connery of the Pottsboro Area Public Library.

McGrath will install the equipment within 30 days of receipt of funds. Connery will be responsible for publicity, communications, and reporting.

Login statistics will be collected.

Sincerely,

*Dianne Connery*
